Tucker Payment Processing - Independent Security Scan

Qualys SSL Labs SSL Server Test

Site tested: **https://tuckerpaymentprocessing.com** | Scan date: **2026-11-24** | Scanner: Qualys SSL Labs v2.4.3

BEFORE FIXES	FINAL
B	**A+**
2026-11-24 21:16 UTC	2026-11-24 21:26 UTC

All four Cloudflare edge addresses (two IPv4, two IPv6) graded A+ after TLS 1.0 and 1.1 were turned off. Before the fix every address was capped at B for accepting those old versions.

What was found and fixed

• Minimum TLS version raised to 1.2 at Cloudflare (SSL Labs: 'This server supports TLS 1.0 and TLS 1.1. Grade capped to B.').

Verify it yourself

Run the same scan live:
https://www.ssllabs.com/ssltest/analyze.html?d=tuckerpaymentprocessing.com&hideResults=on

Method: each scanner was run against the live site from a normal web browser on 2026-11-24. Grades, times (UTC) and check results are recorded exactly as shown on each scanner's result page; the 'Verify it yourself' links run the same scan again live. Scans run by Michael Cunningham with AI assistance (Claude).
